CHINA LESSO GROUP

China Lesso Group Holdings Limited (Stock Name: China Lesso, Stock Code: 2128.HK) is a large industrial group of home building materials in China. China Lesso's products and services cover plumbing products, sanitary ware, holistic kitchen, PVC profile doors and windows, decorative plates, fire-fighting equipment, hygiene materials, ocean aquaculture cages, environmental protection, home furnishing and building material one-stop O2O services, etc. The sales revenue had broken through RMB 20.36 billion in 2017.

With the rapid global development of its businesses, China Lesso has more than 50 holding subsidiaries and more than 26 production bases distributed in 17 provinces of Mainland China, US, Canada, India, Indonesia and Uganda. China Lesso has continually perfected its strategic layout and broadened its sales network and market, to provide products and services to customers in a timely and efficient way.

China Lesso offers a comprehensive range of products in the domestic home building materials area which includes more than 10,000 specifications. The products are being widely used in the areas of home decoration, civil construction, municipal water supply, drainage, electric power communication, gas supply, fire-fighting, environmental protection, agriculture, and oceanic cageculture, etc.

SANITARY WARE

Sanitary Ware is a key product project launched by China Lesso Group Holdings Limited (CHINA LESSO, Stock Code: 2128.HK), and LESSO produces a variety of sanitary products under this name, including ceramic sanitary wares and bathroom fixtures (both vertical and squat pan toilets, urinals, and sinks), bathtubs, shower rooms, bathroom cabinets, faucets, and bathroom accessories. This complete product line has provided customers with one-stop shopping for sanitary products and services.

In terms of R&D and design, LESSO has set up a specialized sanitary product research institute and design team to create sanitary products which are both comfortable and stylish as well as easy to use and able to be smoothly integrated into different modern interior decoration styles. All products in this line emphasize fashion, modernity, and individualism. The affordability and attractiveness of Sanitary Ware products have given the line bright market prospects and have led to their being used in many major interior decoration projects in China, and their quality has been widely recognized by retail consumers.

Sanitary Ware is dedicated to creating relaxing and comfortable bathroom spaces, and will continuously improve its product quality, perfect the details of its products, better meet customer needs with cost-effective products, make bathing more enjoyable than ever, and allow users to relax both physically and mentally.

THE JOY OF PURE QUALITY

Relax your body and mind, and enjoy the pure beauty of life.

LESSO Sanitary Ware strictly adheres to its three values of "human-centricity, internationalization, and high performance". The company is defined by a strong spirit of craftsmanship, focusing on the selection of the best imported materials from around the world, integrating smart technologies, and carefully designing neat, easy-to-use, and comfortable products to create a completely relaxing and comfortable bathroom environment for our customers.

Live better and enjoy your baths more; the modern urban bathroom is a place of unprecedented comfort.

INTELLIGENCE AND CLEANLINESS MAKES FOR HIGH-QUALITY AND STRESS-FREE USE.

Clean, Convenient, Comfortable

The modern bathroom is no longer merely a place to clean one's body, but a space where people can enjoy themselves and relax, and where one's aesthetics and global tastes are reflected.

This new bathroom culture stems from the desire for quality and purity, and our facilities allow you to enjoy a clean, comfortable, and convenient bathing experience.

Smart glaze

Antibacterial,
corrosion resistant

1280°C high- temperature vitrification

Crack-proof;
easy to clean

0.25% ultra- low water absorption

Deodorized
and odor-resistant

Ceramic Sanitary Ware

LESSO ceramic sanitary ware series features classic aesthetics and global quality in all its products, including sitting and squat pan toilets, urinals, sinks, etc.

Our optimized high-density ceramics specially fired at 1280°C high-temperature are coated in a "crystal intelligent and self-cleaning glaze" that features elegant colors and soft lines, making for a smarter and cleaner bathroom.

Every time you use our ceramics, you will enjoy a safe, comfortable, and clean experience.

INTELLIGENT TOILET

LESSO is committed to studying smart sanitary technologies, forming a quadruple-drive business system, and creating comprehensive intelligent cleaning systems with intelligent and clean glazes. Our intelligent one-button operating system and intelligent cleaning system can bring a new intelligent, comfortable, and safe experience to your bathroom and provide you with a higher quality of life.

Two Intelligent Systems

Intelligent cleaning system

- Multi-cleaning function, easy to use**
The three cleaning modes include standard bidet services, gynecological sanitation, and mobile cleaning, and these can be adjusted at any time. The water pressure, temperature, and position can all be adjusted to meet your personal needs. This makes for a more comfortable and helpful bathroom experience.
- Soft bubbling water; spa-like care**
Add bubbles to soften your bidet rinse and give you a more comfortable experience.
- Self-cleaning nozzle, clean and hygienic**
The nozzle is automatically cleaned before and after each spray to ensure that the nozzle is perfectly clean and safe for every use.
- Instant water heating, safe water cleaning**
Old-fashioned tank heating systems are abandoned, instead applying Japanese Kyocera heating rod to ensure the instant application of hot water, which is both hygienic and safe without being subject to time constraints.

Intelligent one-button control

The intelligent one-button control system simplifies all complex operations. With one-button activation, you can enjoy the full-service of automatic bidet cleaning, drying, automatic deodorization, and automatic flushing.

Five-Feature User-Friendly Design

Warm-sensing seat to give you the perfect temperature

The heat-sensing seat can always adjust the temperature to the appropriate level for you in the coldest winter or hottest summer, making for a comfortable and intimate experience.

Colorful magnetic aperture making for a relaxing and lovely personal break.

The colorful magnetic aperture changes in response to different functional uses, and can change its display according to the settings, letting you personalize your experience even further.

Night light to help you when you need it most

The integrated night light shimmers sweetly in the dark to help you accurately position yourself without suffering from harsh direct lighting.

Noise-free slow-descent seat, quiet and carefree

The silent slow-descent seat design reduces noise, physical damage, and other risks caused by the seat's movement and creates a private "zero-noise" space.

Negative pressure suction and deodorization

This system has adopted negative pressure suction technology, so the deodorization function will be activated automatically as you sit down, helping you feel clean and healthy.

Four-Layer Water and Electricity Protection

Leak-proof plug

When there is abnormal leakage or short-circuit within the system, the industrial-quality anti-leakage plug will automatically cut off the power system's power to effectively prevent accidents.

Separate water and electricity pathways

All water components are separated from the circuit components, and the components involved in the water circuit are controlled by physical and mechanical principles to effectively avoid water inflow and leakage.

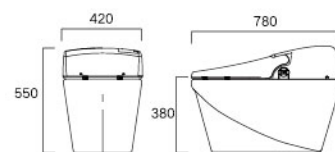

Water pressure protection

A specialized pressure relief valve is installed at the water inlet to ensure that the water pressure of the water entering the toilet does not exceed 3 KG, and this can effectively protect the components inside the toilet from excessive pressure impact and ensure the durability of the overall system. Pressure should be in pascals or other units of pressure?

Flame retardant material

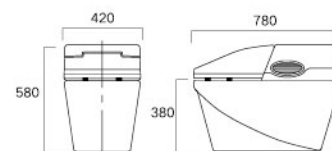

The entire toilet is made of flame-retardant materials, which can eliminate any risk of fire from damaging your bathroom and helping guarantee your personal safety.

1/ Super Siphon System

Unobstructed

LESSO's toilets feature a unique super-siphon system, which integrates water input, output, storage, flushing and discharging functions into a single system, thus arranging all functions in a unified manner and ensuring a more effective and thorough discharge.

By applying imported cistern fittings and a 3" water outlet, the system can also achieve more "powerful" water conservation effects. Thanks to the uniform distribution of water outlets, the large amount of flushing water and 360° flushing effects, any and all fecal residue can be flushed away from the inner wall.

The enlarged siphon nozzle can achieve more powerful flushing effects and more rapid discharging effects. The height of the "water seal" has been raised to 50-70 mm and the area of the seal has been enlarged, ensuring sufficient pressure for generating rapid siphon effects, which can accelerate the discharge and effectively prevent undesirable odors generated from the backflow of gas after flushing from building up in the bathroom.

2/ "Ultra-silent" Design

Noise-free life

This system uses the tensile force of the siphonage pipeline to discharge waste based on the silent siphon theory. Thus, we have designed the injection channel to be underneath the water seal, and have put in place a high-level water seal to effectively reduce noise, creating noise-free sanitary fittings and offering a more gentle and serene bathroom experience.

Three Key Details of Toilet Seat

Make every flush comfortable

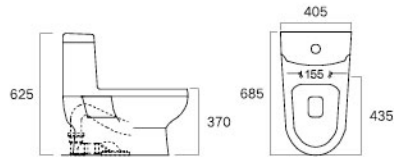

Two Advantages of Intelligent Glaze

More thorough cleaning process

Intelligent glaze with self-cleaning and anti-bacterial function.

LESSO toilets are sprayed with an intelligent glaze added to their traditional glaze via specialized processing technology, which can keep the glaze free from any contamination and provide a more effective cleaning process.

Vitrified at 1280°C in high-temperature ovens, making it crack-resistant and easy-to-clean.

LESSO's ceramic wares are all made from high-performance ceramic substrate, which chemically reacts during the firing process through an advanced 1280°C high-temperature oven, thus achieving completely a vitrified surface, uniform thickness, cracking resistance, and ensuring the pan's beautiful appearance, easy-to-clean nature, and durability.

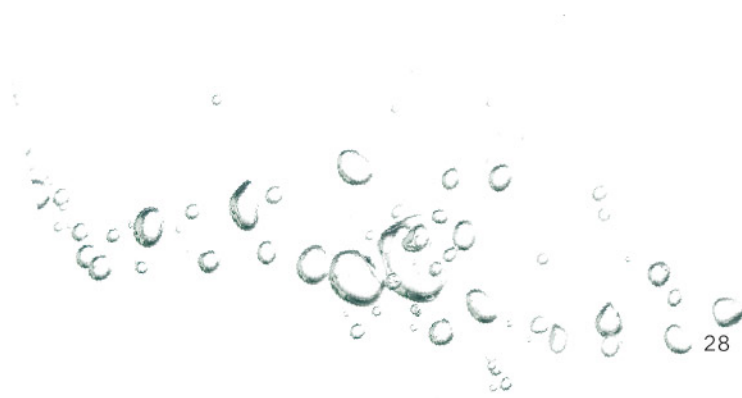

Ultralow water absorption for controlling waste and undesirable odors

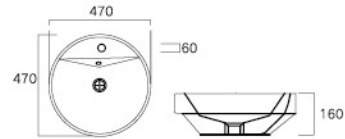

All of LESSO's ceramic products feature a water absorption rate of no more than 0.25%, with vitrified ceramic products at no more than 5% (neither exceeds the international standard of 0.5%), and its relatively smaller pores can effectively reduce the accumulation of dust, control the spread of bacteria and foul gas, thus making a more comfortable and secure bathroom experience.

Patented glaze formulation, providing bright and clean surfaces

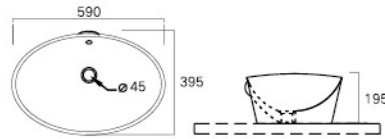

LESSO's advanced, target ceramic glaze formulation provides all of our ceramic wares soft tones and high degrees of gloss (standard white surface is much purer than that of general competing manufacturers, with the brightness of our white color being more than 93% and our eggshell more than 87.1%). This glaze also enhances the surface's mechanical strength and improves its resistance to chemical corrosion.

COMFORTABLE
RELAXING
ENJOYABLE

Get away from the hustle and bustle, spend a few moments by yourself, and enjoy a calm and relaxing bath or shower each day.

LESSO's leisure sanitary wares consist of three types of products; bathtubs, computer-controlled steam rooms, and shower rooms.

Our human-centric product design, globally integrated quality and technology levels, strict quality standards, and meticulous detail processing can allow you to relax both physically and mentally and enjoy a clean and soothing bathing experience, letting you completely relax in the rhythm of the water, enjoying a comfortable and pleasant bath.

ENJOY YOUR BATHS IN COMFORT

Bathtub

Pursue unparalleled enjoyment in the celebration of water.

LESSO's bathtubs feature a simple shape, a remarkable structure, premium-quality raw materials, stylish international designs, and customized product performance. Altogether, our products offer an incomparable bathing experience, and can bring comfortable and relaxing enjoyment to travelers weary in both body and mind.

Integrated
smart design

Intelligent video entertainment,
making for a super-comfortable Bath

Unique style

Simple and elegant structure,
offering new inspiration
for your daily life.

Pure handcrafted
technology

Fluid acrylic molding,
forming a fine and
smooth appearance

Human-
centric design

Curves that conform to the
natural contours of your body,
making it more comfortable
for you to lie down

BATHTUB

The bathtubs employ trendsetting, dynamic, and smart designs that better reflect and appeal to your taste. And advanced intelligent technologies can allow you to experience the perfect combination of artistry and practicality, as well as optimum quality and overall feeling, thus enjoying an unparalleled bathing experience.

Unique Artistic Design

The dynamic bathtub series have been specially designed one of the leading American superstar engineers in the industrial design field, who is renowned for the artistic style of his interior and exterior spatial designs, fashion boutique designs, furniture designs, lighting equipment designs, art designs, and product designs. His innovative products have transformed the aesthetics of entire industries and the essence of consumer culture.

The dynamic bathtub series are designed following his unique aesthetic vision and are focused on perfecting every detail of the bathing experience. In addition to offering a distinctive character, his designs promote the simple bath as a form of life's most sublime joys.

Unique Style, Personal and Romantic

The unique styling and brilliant color of the Dynamic bathtub series can provide more emotional stimulation and inspiration in your home.

Korean Handmade Components

These handmade Korean elements and fluid acrylic molding create a fine, smooth, and color-consistent appearance.

Ergonomic Design for Comfortable Bathing

These tubs' human-centric design conforms to the physiological curve of the neck and spine, letting you to fully recline in comfort and let all of your stress go.

Intelligent Design for a Super-enjoyable Bath

The smart entertainment video system makes it possible for you to watch television or listen to your favorite music in the bath, helping to integrate entertainment and bathing functions and helping you to better relax and enjoy your baths.

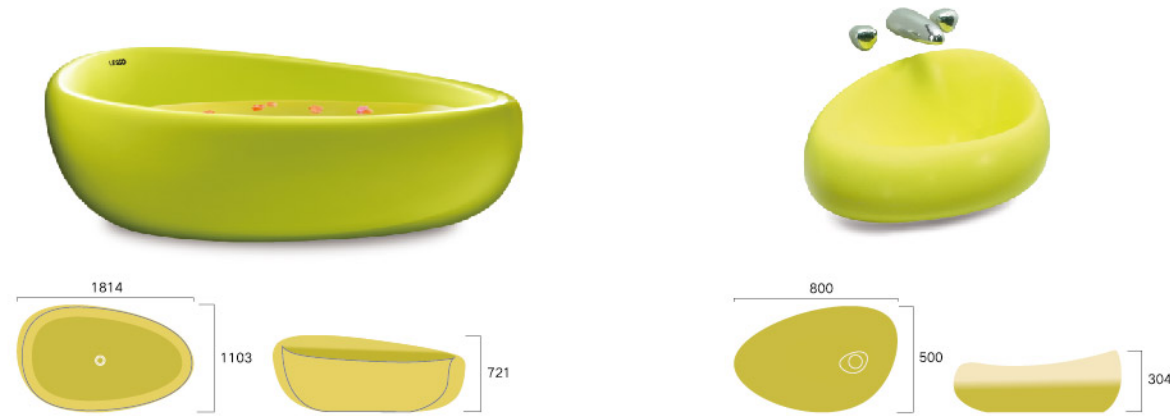

COBBLE SERIES

Perfect combination of practicality and art

The bathtub's edges conform to the physiological curve of the human neck and allow you to lay down in comfort, and the integrated unibody structure of the headrest and bathtub can help you relieve stress and bathe in greater comfort.

Unique style & refreshing colors

The bright & refreshing colors and unique & smooth cobbled appearance make the sinks and bathtubs appear more natural and dynamic, forming an artistic spotlights for family life and bringing new inspiration and aesthetic stimulation into the home.

SPA MASSAGE BATHTUB SERIES

When you come back home after a long and busy day, more than anything else you may wish for a trip to the spa to massage your sore and tired bones — but you probably won't want to leave your home.

LESSO's spa massage bathtub series is the perfect solution for this, the ultimate combination of artistry and modern science. It features a highly creative and evocative appearance and practical functions that have been optimized through a dedicated design process for every detail.

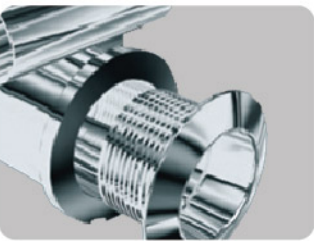

Thanks to this series' intelligent control systems, you can enjoy a fantastic spa-style massage while enjoying some soft and glass of wine, helping your body totally relax and letting you live your life the way you should.

Two Advantages of Spa Massage Bathtub

This bathtub's specialized spa experience turns a simple bath into a deeply luxurious health treatment, helping you to completely relax and soothe your mind and body.

Items	Ventral spa massage system	Traditional bubble jet system
Healthcare	The ventral massage system combines a spa massage with pneumatic massage together to stimulate blood circulation and help you enjoy greater physical and mental relaxation.	The bubble jet system can stimulate the skin with endless streams of air bubbles, providing you with gentle stimulation but little deep relaxation effects.
Comfort	The spa massage system features with flowing cyclical water pressure from spinning pumps, providing a stimulating massage effect and making you feel comfortable and safe.	Since most air blowers intake cold air, you may still feel that the bubbles are cold even when you and the water are both warm. Further, these systems are extremely noisy compared to standard water pumps.

Nozzle schematic

Combining with ergonomic principles and acupoint massage, these massaging nozzle can help you relieve stress.

The propeller massage system combines spa massages with pneumatic massages to stimulate blood circulation and help you relax physically and mentally.

Specialized ventral nozzle massage

💡 Smart control: convenience and comfort

LESSO's massage bathtubs are designed with a fashionable and intelligent touch-screen control panel for adjusting water temperature, time, massage frequency, and other parameters, which can make the bathing and massage process more intelligent and convenient.

🔧 Commercial faucets, dedicated and durable

Our faucets are made from select high-quality materials, and their surfaces have been rendered clean and smooth after multiple rounds of plating, and will remain bright and shining after extended use.

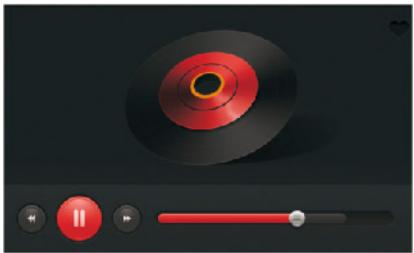

🛡️ Multiple protection systems for your comfort and safety

LESSO's massage bathtubs all featured overtime protection, water shortage protection, overheating protection, and multiple intelligent settings, all of which can help guarantee your safety and comfort.

🧑 Ergonomic design for a more comfortable bath

LESSO's massage bathtubs feature an ergonomic physical design, with the inner bathtub conforming to natural body curves, well-set massage nozzles and high-quality polyurethane back massage cushions, which allow you to transform your bathtub into a luxuriant oasis of comfort.

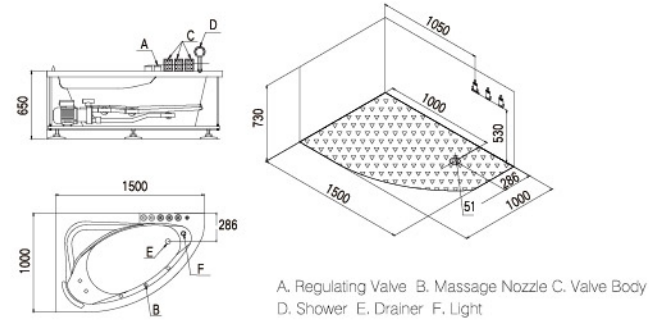

🎵 Musical function for your listening pleasure

LESSO's massage bathtubs are designed with MP3 and radio functions, which allow you to enjoy the pleasure of musical relaxation while bathing, thus achieving a significant degree of tactile and aural satisfaction.

STEAM ROOM

Relaxation begins with the skin

LESSO's steam rooms are designed with a brand-new intelligent operations system, which can help please your sense of vision, hearing, touch and full-body sensation in a comprehensive and multi-layer way. Our low-noise steam engine can create a silent steam room environment and allow you to feel the power of water from head to your feet, relaxing and cleansing your skin in perfect silence. A sublimely free, relaxing, and pleasant experience!

Enjoy the good life from this moment onward!

STEAM ROOM

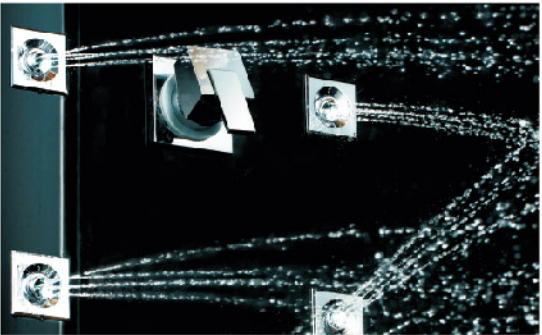

LESSO's computer-controlled steam rooms feature multiple functions, combining steam, colorful lights, music, bath, and air exhaust in one integrated system, thus pleasing to the eye, the ear, the hand, and the skin in a comprehensive and multi-layered fashion.

💡 Intelligent control for convenient operations

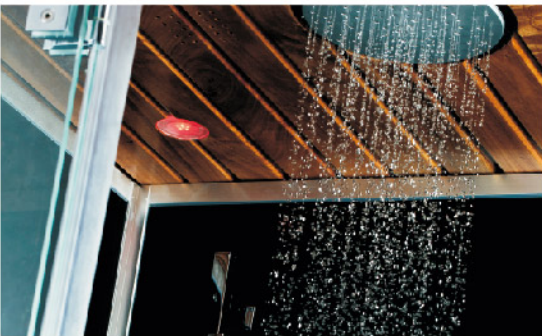

Our digital computer-based controllers are rationally and intuitively designed for intelligent control performance and in accordance with the application requirements. By abandoning tedious operation procedures, you can enjoy a relaxing steam bath at one touch, providing extraordinary comfort and convenience at the press of a button.

Electronic temperature-tracking faucets make it possible to check your water temperature on the display screen while bathing, making for highly convenient visual control.

🌿 Acupuncture massage nozzles for better effects

This tub is designed with copper acupuncture massage functions with more powerful massage force, thus fully invigorating your skin, and bringing you extraordinary comfortable experience.

🌀 Low-noise steam engine for silent experience

Low-noise massage pumps can reduce the operating noise and enhance the comfort level of your bathing.

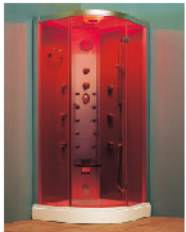

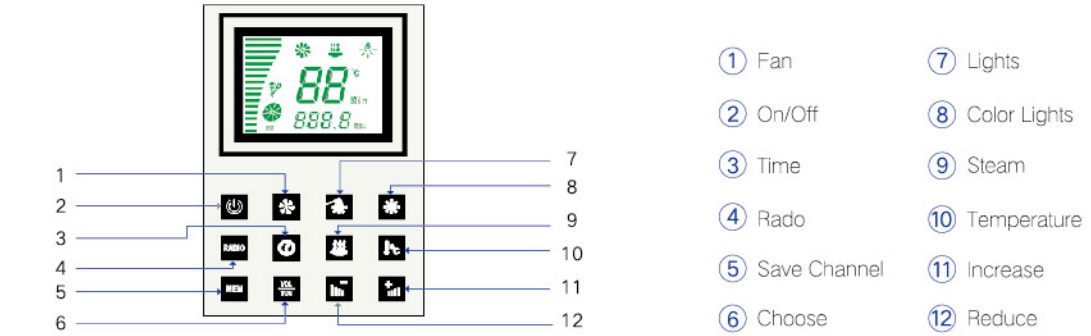

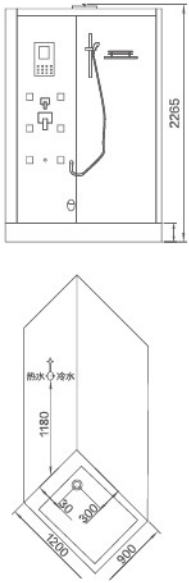

Computer-based Steam Room

Computer-based steam rooms

Red Inspiration

Red symbolizes movement, passion, and emotions; can adjust the heart rate to relieve psychological stress and recover energy and physical strength.

Yellow Enthusiasm

Yellow reflects cheerfulness, vividness, hope, optimism, and other strong emotions, and it can stimulate the nervous and digestive systems and strengthen logical thinking.

Purple Romantic

Purple can enhance creative and cognitive ability. According to studies, thinking efficiency under purple lights is 10 times that of under white lights. Purple is the best choice when you want to think deeply.

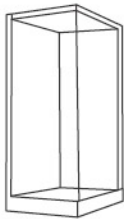

Orange Encouragement

Orange represents warmth, health, maturity, and happy, and is an excellent color for dealing with depression.

Blue Recovery

Blue represents peace and calmness. According to one study, marine blue or light blue has a calming effect on the brain, allowing you to fully relax your mind and body while enjoying the feeling of surfing on the sea.

SHOWER ROOM

Safe, peaceful, and happy bathrooms

The world is a very complicated place, and people yearn for a private place where they can escape from their worries and cares and cleanse themselves of stress.

LESSO's shower rooms are designed with high-quality materials and hardware fittings from around the world, and form a peaceful and cozy world that is liberated from the difficulties of daily life.

Enjoy the purity and comfort of a superior shower.

Tempered auto glass

Safer and more comfortable

6 Major Advantages & Quality Assurance

Excellent materials make for a new level in quality

LESSO shower rooms use #304 stainless steel of the highest grade available for civil use, and this material is resistant to both corrosion and wear and is not easily deformed. After processing, the surface will resemble that of a 10K-grade polished mirror: bright, transparent, and easy to clean.

	LESSO shower rooms	Other shower rooms
Material thickness	1.0mm	0.6-0.8mm
Material	#304 stainless steel	#201/202 (commonly known as stainless iron)
Reflectivity	10K (super fine grinding)	6K (normal)/8K (fine grinding)

No damage within first 10 years

fully enclosed #304 stainless steel bearing pulleys, with an estimated service life of more than 10 years.

LESSO stainless steel bearing pulley	Carbon steel pulley	Zinc alloy pulley	Copper rubberized pulley
10 years	1-2years	2-3years	About 3 years

Safe and secure, BMW-grade high-strength tempered glass

LESSO shower rooms use BMW-grade tempered glass with high purity, uniform tempering, and high safety factors. Their degree of fragmentation is superior to the national standard, and the safe number of fragments in a 50×50 mm sheet is 60 to 80.

Granular fragments in LESSO shower rooms	Granular fragments in other shower rooms	National standard	Copper rubberized pulley
50×50mm/ 60-80 grains	50×50mm/ 20-40 grains	50×50mm/ 40 grains or more	About 3 years

Our cutting-edge nano self-cleaning process offers you a neat shower space that is easy to clean.

	LESSO shower rooms	Other shower rooms
Effect	Free from stains on the glass surface, easier to clean	Easily stained, difficult to clean
Period of effectiveness	Super hydrophilic nano self-cleaning process from Germany; longer period of effectiveness	Hydrophobic nano structures, short period of effectiveness

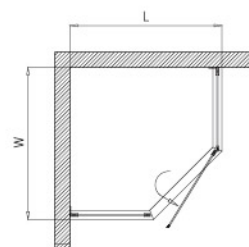

Safe and shatter-resistant; the safest choice for you and your family

	LESSO	Others
Rigidity	Twice as resistant as ordinary glass	International standard
Safety	The glass remains as it is when it is broken resulting in zero damage to the human body	Will fall in the case of accidental collisions, resulting in frequent risk of injury

Ironmongery

	LESSO	Others
Stainless steel	304 SUS,high performance in corrosion resistance	#202 stainless steel, poor corrosion resistance; easily deformed
Surface treatment	The electroplating layer exceeds the national standard of 10 μm	Roughly polished 3 to 6 μm of plating; easily rusted
Detailed design	Each product is independently developed to ensure precision	Components used in multiple products; poor structural compatibility

HAILING BATHROOM CABINETS FOR A BETTER LIFE

FASHION, SIMPLE, CHARMING

LESSO bathroom cabinets are designed with a strict perfectionistic philosophy. We select the finest imported timber from Canada and imbue them with art, creativity, and science through our integrated production process.

This product line integrates plumbing and bathroom ablutions, dressing tables, storage, and other functions, and covers a wide range of specialized products including mirrors, cabinets, countertops, basins, sinks, faucets, etc.

We employ advanced international machining procedures and different styles of design to rethink the traditional bathroom cabinet and fixture design philosophy.

The product line covers sunshine and fashion series, modern and concise series, European-style series. And it differentiates and features stylish designs and high-quality performance, which meets every family's goals of living a luxurious yet comfortable lifestyle.

5 MAJOR QUALITY ADVANTAGES OF LESSO BATHROOM CABINETS

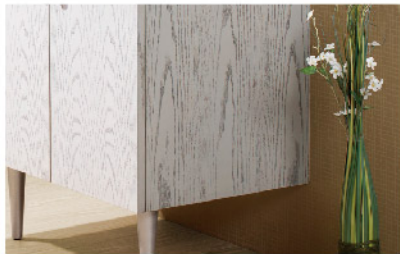

Rich In Style To Meet The Design Requirements Of The Modern Home

The Sunshine & Fashion Series, Modern & Concise Series, European-Style Series, and other product lines each feature their own unique design styles, and each style is unique in appearance and temperament, which meets the requirements of people of different tastes for their own individual interior decoration.

User-friendly Design of Storage Space

We employ a user-friendly concept, as well as optimized and effective storage partitions, which are effectively designed for easy access; our cabinets also make full use of internal space to provide the maximum possible space required for all daily toiletries.

Imported Solid Wood: High-end and Elegant Effects

We utilize rubber wood imported from Thailand for its clear and beautiful surface textures, as well as for the gentle "wood odor" it provides for the home environment. The resulting products provides our users with comfort and maximum quality as well as an intimate connection with nature.

High-end Hardware: Silent and Comfortable

We also offer a number of optional high-end hardware attachments, including a hydraulic buffer hinge, a silent guide rail, a buffer slide, and other hardware, ensuring that the cabinet opens and closes smoothly and quietly each time, keeping your bathroom unified within a single peaceful and relaxing aesthetic.

High-quality Bathroom Mirrors: Clear and Fog-Resistant

We utilize high-quality float glass produced by Taiwan Glass because of its high degree of brightness, strong fog resistance, and freedom from image distortion.

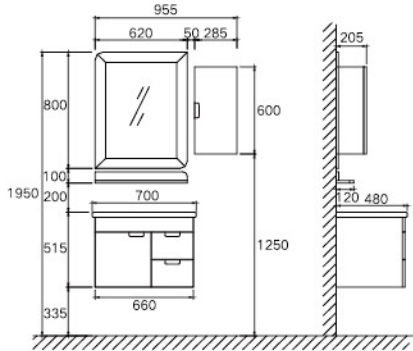

Bathroom Cabinet LG1107

Solid Wood Board, White+Red

Product Parameter	Parts Model	Size(mm)
Main Cabinet	LG1107Z	660×465×480
Mirror	LG1107J	620×120×878
Cabinet Beside the Mirror	LG1107C	285×205×600

Main Cabinet	LG2506Z	780×460×800
Mirror	LG2506J	780×135×780
Basin	LM1456	800×485×50(Side)

Note: Not including the drainer and Faucet

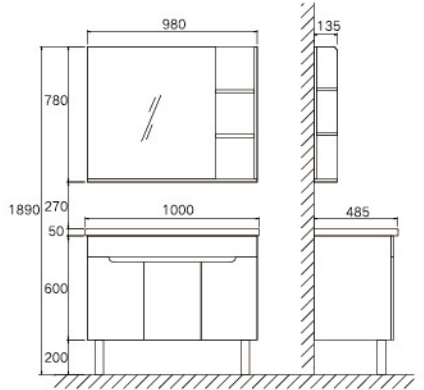

Bathroom Cabinet LG2507

Solid Wood Board, White+Black

Product Parameter	Parts Model	Size(mm)
Main Cabinet	LG2507Z	980×460×800
Mirror	LG2507J	980×135×780
Basin	LM1461	1000×485×50(Side)

Note: Not including the Faucet and drainer

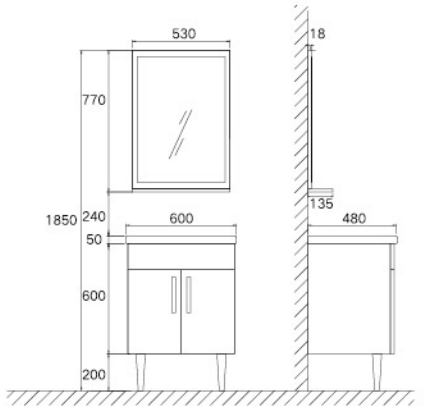

Bathroom Cabinet LG2508

High Density Solid Wood Board, Pear Yellow Wood

Product Parameter	Parts Model	Size(mm)
Main Cabinet	LG2508Z	580×470×800
Mirror	LG2508J	530×135×770
Basin	LM1471	600×480×50(Side)

Note: Not including the Faucet and drainer

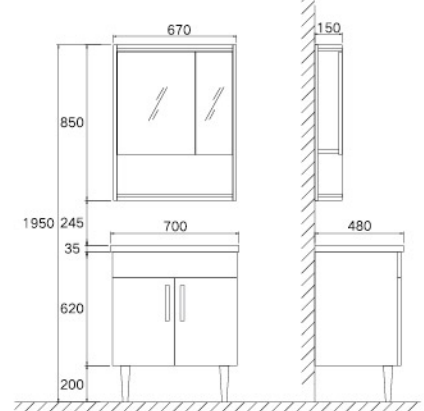

Bathroom Cabinet LG2512

High Density Solid Wood Board, Pear Yellow Wood

Product Parameter	Parts Model	Size(mm)
Main Cabinet	LG2512Z	680×470×820
Mirror	LG2512J	670×150×850
Basin	LM1458	700×480×35(Side)

Note: Not including the Faucet and drainer

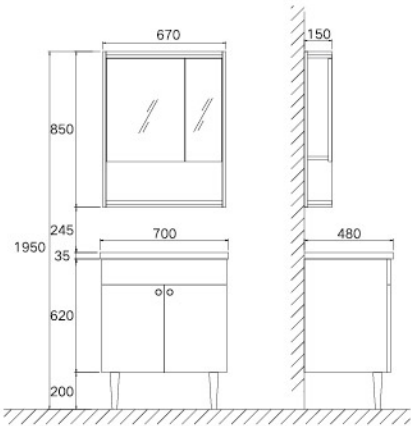

Bathroom Cabinet **LG2513**

Solid Wood Board, Oak-grain White

Product Parameter	Parts Model	Size(mm)
Main Cabine	LG2513Z	680×470×820
Mirror	LG2513J	670×150×850
Basin	LM1458	700×480×35(Side)

Note: Not including the Faucet and drainer

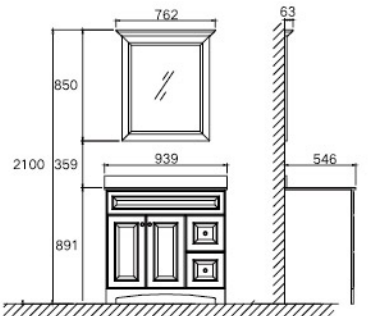

Bathroom Cabinet **LG2504**

Paint Solid Wood Board, White

Product Parameter	Parts Model	Size(mm)
Main Cabinet	LG2504Z	914×533×876
Mirror	LG2504J	762×63×850
Basin	LG2504T	939×15(Side)×546

Note:
1.Basin includes synthetic stone counter-top (939x546x15mm), WaterBaffle (939x15x89mm) and the Ceramic Under Mount BasinLM1512(560X380X180MM)
2.Black and Brown can be customized
3.Not including the Faucet and draine

Optional Configuration	Code	Notes
Faucet	W32213	Optional,Sold Sparately
Drainer	WP08401	Optional,Sold Sparately

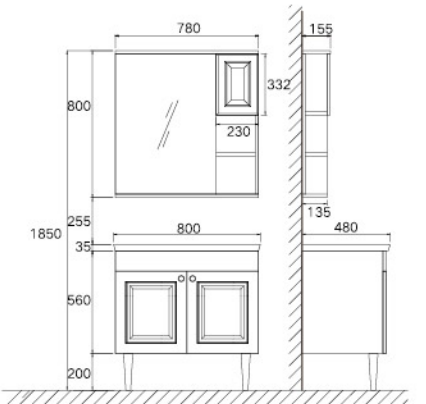

Bathroom Cabinet **LG2509**

Solid Wood Board, White

Product Parameter	Parts Model	Size(mm)
Main Cabinet	LG2509Z	780×460×760
Mirror	LG2509J	780×155×800
Basin	LM1457	800×480×35(Side)

Note:
1.MDF and White wood-like PVC are both Chosed for door material
2.Not including the Faucet and drainer

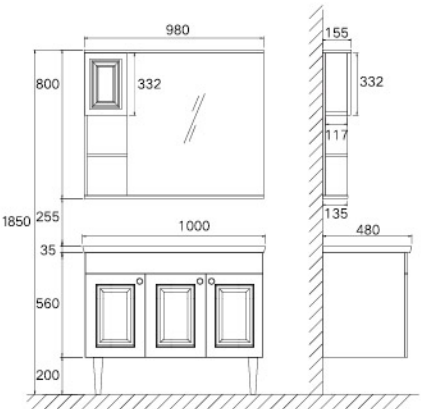

Bathroom Cabinet **LG2510**

Solid Wood Board, White

Product Parameter	Parts Model	Size(mm)
Main Cabinet	LG2510Z	970×460×760
Mirror	LG2510J	980×155×800
Basin	LM1462	1000×480×35(Side)

Note:
1.MDF and White wood-like PVC are both chosed for door Material
2.Not including the Faucet and drainer

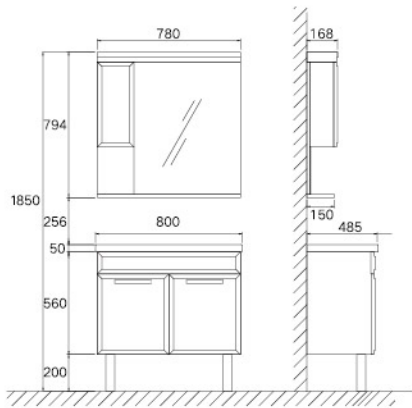

Bathroom Cabinet LG2511

Solid Wood Board, White

Product Parameter	Parts Model	Size(mm)
Main Cabinet	LG2511Z	780×467×760
Mirror (including backboard, sub-cabinet, and shelf)	LG2511J	780×168×794
Basin	LM1456	800×485×50(Side)

Note:

SAFE, CLEAN AND HEALTHY

Our desire is to create water-centered healthy spaces filled with love and dream.

LESSO bathroom accessories strictly adhere to high-quality, refinement and exquisite design, which arouse people's feelings. And rich and detailed functions meet individuals' requirements.

Modern bathroom settings create a new look for bathrooms.

LEAD-FREE WATER TO PROTECT YOUR HEALTH

FAUCET SERIES

Higher quality means superior comfort. LESSO faucets are focused on perfecting our industry-leading lead-free industrial processing and scientific design processes to ensure pollution-free water supplies and to fulfill our responsibility to care for the physical and mental health of all our users. These faucets feature an elegant appearance and comfortable surface inspired by the slowly flowing water that defines their use, and their integrated function and design makes life cleaner, purer, and healthier.

Primary Material:
Copper/low-lead copper; Chromium surface plating

6 Major Details Make a Good Faucet

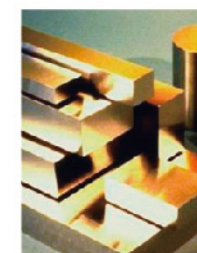

Modern stylistic elements

LESSO faucets incorporate classic, simple, elegant and other different styles of products. In design terms, we have also introduced fashionable design elements and smooth lines, and with our 3-layer quality plating technology, the final product surface is always fine and smooth. We have fully studied the art of providing comfort and convenience and have designed these faucets to perfectly integrate with popular home design elements, so that the faucet will become a highlight in your home that will never become out-of-date.

Fine copper casting, for better lead removal

LESSO faucets use A+ quality H59 copper and the world's most advanced gravity casting processes, resulting in healthy, lead-free, and environmentally-friendly water.

High-quality
A+ H59 copper

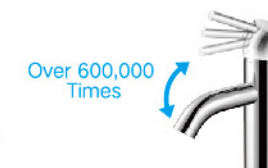

Imported valve core with a service life of up to 60 years

LESSO adopts imported precision ceramic valve cores (the valve core is a core component of the faucet that regulates the opening and closing of the faucet as well as the flow of water), so it feels comfortable and light. It features excellent quality and is still smooth and saves energy without leakage after more than 600,000 openings-and-closings (Based on 30 uses per day, resulting a service life of up to 60 years).

Imported ceramic valve core

Over 600,000
Times

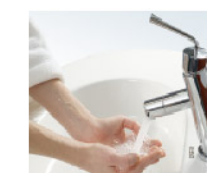

30 times opening and closing each day
up to 60 years of service life

High-quality bubbler that saves more than 40% of water used

LESSO's high-performance water-saving bubbler precisely calculates the mixing ratio of water and air and controls the effluent at 4L/min via the negative pressure air injection principle, which saves more than 40% of water compared to an ordinary bubbler.

High performance
water-saving bubbler

Saves 40% more water than
ordinary bubblers, resulting in
about 1 to 2 tons of water saved
each month.

SUS304 stainless steel: healthy and durable

LESSO stainless steel faucets use high-quality SUS304 stainless steel (Japanese SUS austenitic stainless steel, equivalent to the US national standard 304), resulting in high performance due to good corrosion resistance, heat resistance, low temperature strength, and superior mechanical properties.

3-layer fine plating process: bright and lasting, no paint needed

LESSO's advanced electroplating process coats its faucets under 3 layers of different coatings of copper, nickel, and chromium respectively. The chromium plating layer is more than 0.25 μm (inclusive) and the nickel plating layer is more than 8 μm (inclusive). This advanced process results in a bright and durable appearance with no paint used or needed.

SWAN SERIES

This series is inspired by swans,
and its streamlined handle resembles a swan's beak.
Its primary curve structure and overall profile lines are smooth,
simple, elegant, and distinguished,
following the influence of the 'swan' design.

INTELLIGENT SENSOR SERIES

Utilizes an automatic infrared sensor, for safe and worry-free use.

Employs a simple and elegant design, suitable for installation in all settings and scenarios.

Polished and plated with chromium; durable, beautiful, and easy to clean.

Intelligent sensor basin faucet W32601 NEW!

Main Material: Low-lead Copper: DN15

Intelligent sensor flushing device LB1201 NEW!

Main Material: #304 stainless steel + low-lead copper
Dimensions (mm): 136×136

STAINLESS STEEL SINK SERIES

In the end, ornamentation always falls away from the brightest and most beautiful things in life, and routine reveals the true nature of all people and objects as they are washed again and again in the river of life.

LESSO focuses on the three principles of health, user-friendliness, and comfort, and has used these core guidelines to create healthy stainless steel sinks that are exquisite in appearance, high-quality, resistant to rust, easy to clean, and highly differentiated, while making it easier for you to wash and making your life that much easier.

All-in-one process, no gaps, improved reliability.

Environmentally friendly thick electroplating effectively prevents condensate and prevents the cabinet from rotting.

Food-grade SUS304 stainless steel; healthy and durable.

**Stainless Steel Double Sink
CS11220**

Size(mm): 760×430×200×0.8
Main Material: 304 Stainless Steel
Surface Treatment: Polish and Brush
Note: Including the drainer and sewer

**Stainless Steel Double Sink
CS11223**

Size(mm): 800×440×205×1.2
Main Material: 304 Stainless Steel
Surface Treatment: Polish and Brush
Note: Including the drainer

**Stainless Steel Double Sink
CS11224**

Size(mm): 760×510×228×1.2
Main Material: 304 Stainless Steel
Surface Treatment: Polish and Brush
Note: Including the drainer, not including the faucet

**Stainless Steel Double Sink
CS11216**

Size(mm): 780×430×230×1
Main Material: 304 Stainless Steel
Surface Treatment: Polish and Brush
Note: Including the drainer and sewer

**Stainless Steel Double Sink
CS11217**

Size(mm): 780×420×200×0.8
Main Material: 304 Stainless Steel
Surface Treatment: Polish and Brush
Note: Not including the drainer,
sewer and faucet

**Stainless Steel Double Sink
CS11218**

Size(mm): 750×400×200×0.8
Main Material: 201 Stainless Steel
Surface Treatment: Polish and Brush
Note: Not including the drainer and sewer

Note: Not including the drainer

REFRESHING PLEASURABLE ENJOYABLE

When night comes, it's time to shake off the worries and cares of the day, take a shower, and enjoy the relaxation and peace that only water can bring, and these multifunctional showers are the perfect tool to help you decompress. Their streamlined contours, exquisite internal and external beauty, and quality assurance makes for a perfect bathing experience. These fixtures will rain clear and tender drops of water on your hair, eyes, and lips, as if they had fallen from clouds drifting above the Amazon rainforest, coating your skin and washing your cares away. At that moment, the entire world stands still, and nothing exists other than you and the water.

SHOWER

LESSO's shower products are mainly made of high-quality A+ grade H59 copper with imported valve cores. We employ an advanced gravity casting process and three fine layers of surface electroplating. After precision machining is complete these products are characterized by their beautiful style, their excellent quality, and their lead-free and environmentally-friendly status.

The three major functions of spray, massage, and shower can all be combined in different ways. With the touch of a single button, you can make your daily bathing rituals more relaxing and engaging than ever.

THE 5 MAJOR ADVANTAGES OF MULTIFUNCTIONAL SHOWER

💎 Quality materials, health safeguards, and environmental-friendliness

LESSO showers use high-quality A+ H59 copper and a gravity casting process, which is both healthy and environmentally-friendly as this procedure removes virtually all lead.

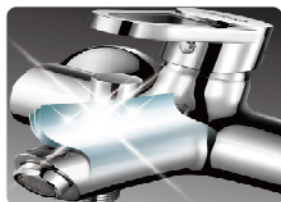

Our unique ultra-healthy lead removal technology is adopted for connecting pipes, and their lead content is reduced to less than 0.2%, so it provides every family with a safe, environmentally-friendly, and healthy shower experience.

The shower head is made of high-quality ABS material. The product is characterized by toughness and impact-resistance, and it will not be affected by being dropped on the ground.

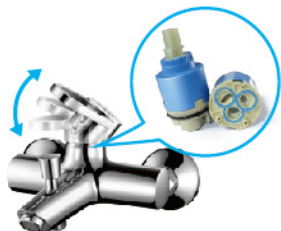

The shower hose adopts double-lock, which avoids the detachment and embraces long service time.

≡ Utilizes 3-layer fine electroplating process: lasting and bright color, no paint needed

Our advanced electroplating process applies 3 different layers of coatings on our shower heads, which are copper, nickel, and chromium respectively. The chromium plating layer is more than 0.25 μm thick (inclusive). This process results in bright and durable finished products without the use of paint.

⌚ Imported valve core with a service life of up to 60 years

The valve core is a core component of the faucet which regulates the opening and closing of the faucet itself as well as the flow of water. LESSO adopts an imported precision ceramic valve core, so it feels both comfortable and light. It features excellent quality and is still smooth to operate and saves energy without leakage after more than 600,000 uses (30 times opening and closing the faucet each day, for up to 60 years).

🧼 TPR Automatic Cleaning, Sanitary and Environmentally Friendly

The shower head is equipped with a TPR spout that is automatically self-cleaning, which is environmentally friendly and non-toxic and can automatically clean dirt and debris buildups.

💧 Three Major Water Functions for Maximum Freedom and Comfort

Scientific research has proven that exposure to water stimulates the circulation of blood in humans, and that spray effects promotes blood circulation during the bathing process as it creates a massage effect. LESSO shower heads have three major functions: spray, massage, and shower, and these can be combined in different ways. Customers can experiment and combine these different effects as they wish.

BATHROOM ACCESSORIES

LESSO bathroom accessories are primarily made of high-quality H59 copper, zinc alloy, aluminum alloy, stainless steel, and glass. After undergoing a high-precision plating procedure and 12 hours of an acid salt spray test, their paint is highly resistant to peeling, and their surfaces are smooth and easy to clean.

LESSO bathroom accessories are characterized by their comprehensiveness in terms of product type, as well as their remarkable quality and exquisite appearance, and these factors have won favor among our customers.

Grade A+ high-quality H59 copper

LESSO copper pendants are made of high-quality H59 copper.

Rust-resistant and easy to clean

LESSO bathroom accessories employ electroplating, electrolysis, brushed stainless steel, and other types of surface treatment processes, which are characterized by their careful selection and use, exquisite appearance, rust resistance, easiness to clean and use, and other user-friendly features.

Size(mm): 144x105x144
Main Material: Brass+Stainless Steel

Double Robe Hook
WP90159
Size(mm): 66x76x54
Main Material: Brass+Stainless Steel+Zinc Alloy

Double Tumbler Holder
WP90160
Size(mm): 169x98x98
Main Material: Brass+Stainless Steel+Zinc Alloy

Toilet Brush
WP90162
Size(mm): 144x166x380
Main Material: Brass+Stainless Steel+Zinc Alloy

Tissue Holder
WP90163
Size(mm): 144x115x144
Main Material: Brass+Stainless Steel+Zinc Alloy

Soap Holder
WP90161
Size(mm): 140x153x55
Main Material: Brass+Stainless Steel

Pendant - 5 Series

Pendant - 6 Series

Double Towel Shelf
WP90164
Size(mm): 654x201x107
Main Material: Stainless Steel

Single Towel Shelf
WP90166
Size(mm): 654x71x54
Main Material: Stainless Steel

Towel Rack
WP90167
Size(mm): Diameter 170x71x195
Main Material: Stainless Steel

Single Robe Hook
WP90168
Size(mm): 54x61x54
Main Material: Stainless Steel

Double Robe Hook
WP90169
Size(mm): 54x61x54
Main Material: Stainless Steel

Double Tumbler Holder
WP90170
Size(mm): 181x96x95
Main Material: Stainless Steel+glass

Tissue Holder
WP90172
Size(mm): 144x111x144
Main Material: Stainless Steel

Bathroom Accessory Set
WP91001 NEW!
Main Material: 201
Stainless Steel
Note: Including four items

> Valve Spool Series

Water-seal-above High Ceramic Valve Spool
WP18101
Size: ϕ 35
Main Material: Plastic ,Ceramic

High Ceramic Valve Spool
WP18102
Size: ϕ 35
Main Material: Plastic ,Ceramic

Flat Ceramic Valve Spool
WP18201
Size: ϕ 35
Main Material: Plastic ,Ceramic

Flat Ceramic Valve Spool
WP18202
Size: ϕ 40
Main Material: Plastic, Ceramic

Flat Reversed Ceramic Valve Spool
WP18203
Size: ϕ 35
Main Material: Plastic, Ceramic

Brass Valve Spool
WP18301
Size: M20x1.5
